RIDGE VALLEY SCHOOL

About Us

Ridge Valley School was established in 2010 in DLF Phase 4, Gurugram by the DLF QEC trust.

Spread over 6-acres of land in a prime location of Gurugram, Haryana, this school has large open areas for co-curricular and sports activities for its students. Ridge Valley has created a niche for itself for its community approach in all aspects of education. The school nurtures children in a caring environment and enables them to realise their full potential. The infrastructure complements the school's value of creating spaces of excellence for all its students. The school has well equipped classrooms, state of the art laboratories, a beautiful open-air amphitheatre and excellent sports facilities.

The school is tech enabled, utilising a series of cutting-edge teaching methodologies and tools including augmented and virtual reality, AI driven education and the latest in digital innovations.

At Ridge Valley School, we celebrate the exuberance of childhood and nurture it with great care. Individualised attention enables every child to develop at his or her own pace. The school focuses on a holistic education for life through social and emotional learning. Every child is prepared to create and thrive in a future which is sustainable, eco-friendly and inclusive.

To catch a glimpse of life at Ridge Valley School, we welcome you to visit the school and spend a few hours with us.

Vision

To help build a sustainable, progressive future by nurturing and empowering future generations.

Mission

To deliver education that recognises the potential of each child through value, vision and harmony

A Happy School

A school with a high Happy index quotient, we believe in a joyful and caring environment. We aim to enhance our learner's emotional, social and intellectual quotient. We lay immense emphasis on value-based education and each person's cerebral and spiritual well-being. Education for life is intrinsic to our teaching and learning experience. We integrate this through an inter disciplinary pedagogy which focuses on peer tutoring, flip classroom, hands on experiential learning and collaborative practices.

Creativity And Imagination

Our strength is the ability to nurture children through transformative competencies, creativity, communication, collaboration and critical thinking. Our engagement with students is led by personalised learning which positively impacts each child. Student voice and advocacy are championed through the unique concept of SLC (Student Led Conferences) where children walk their parents through their experience, showcasing their individualised portfolio boxes. This helps in exhibiting the learning journey of each child both academically and in co-scholastics.

Close To Nature

Our school is a haven of green playing fields and trees spread over a large area away from the heat, dust and noise of the city. For each of our students, Ridge Valley is a home away from home. The school has a highly motivated horticulture team who not only maintain a green nursery within the campus but also create herbal gardens maintained by students. The organic produce from these gardens is distributed liberally across the community. Focusing on sustainable development goals, we lower our carbon footprint through recycling and a number of eco-friendly initiatives.

Accommodating & Inclusive

The school has a progressive and sensitive Special Educations Needs program in place with trained specialists for children who are alternatively abled. Each child is treated with love and care which helps them to evolve into independent self-learners. Ridge Valley is a school where teachers know each student individually. The school has a mentor-mentee program in place. Each child is also assigned a buddy to ensure peer bonding. Students with special abilities are integrated into classroom learning and are given a variety of choices from music, arts, Bharatnatyam to artificial intelligence. The school also has an evening centre for differently abled students.

Clean & Safe

Safety and Hygiene is paramount to our school. We follow international protocols for prevention of Covid and other viruses. Our catering facility is healthy and hygienic, free from junk food. Our students learn in sunlit large classrooms that are covered with CCTV cameras along with the entire building. A well-trained nurse and doctor are available on call with a well-equipped medical room.

Sports

Sports are a very integral part of holistic development. The sports activities at Ridge Valley are aimed at developing children physically, mentally and spiritually. The sports activities that we offer are cricket, football, basketball, tennis, skating, taekwondo, athletics, gymnastics, swimming and horse riding.

We have designed a unique Golf Enrichment Program to help your child master the game of golf within the school premises, making it the first ever golf academy in Gurugram. Through this program, we teach your child the fundamentals of the game and golf etiquette, along with aiding them in overall development.

Our faculty is not just trained to manage our excellent sports programs but also motivated to upgrade themselves with the latest trends across the world in sports.

Innovative & Flexible

With flexibility in learning and teaching, we offer a wide range of experiential learning opportunities where the students have the freedom to choose their projects and construct their own knowledge. We encourage working on previously acquired knowledge for self-dependent learning. The students are given an opportunity to learn several languages, both regional and international from an early age.

Student choice and advocacy are integral to learning in our school with particular emphasis on career guidance and counselling by trained personnel.

Tech Savvy

Ridge Valley School has showcased a CBSE-Meta collaboration for STEM learning. We have always emphasised innovation with immersive technology i.e., Robotics, Augmented and Virtual Reality and now we are evolving a new pedagogy of STEM education with a core dedicated faculty who are adopting these technologies and working towards giving students an engrossing learning experience. We are also a Microsoft Showcase school with teachers who are Adobe, Apple and Google Classroom trained, and recognized as Microsoft innovator educators and Google Classroom trained.

Ridge Valley School believes with augmented reality integrated into the curriculum, students will be able to collaborate more actively and creatively using emerging technologies in the near future.

Dr. Ameeta M. Wattal

Chairperson and Executive Director
Education, Innovations and Training

Children are bursting with promise, potential and possibility. Let us fill their lives with love and wonder. Helping them to discover 'muchness', which is a full hearted abundance of joy, hope and imagination that each child is born with. We need to nurture this to help them to live bravely, care deeply and get the most out of life and learning.

Ms. Nidhi Tewari

Principal Ridge Valley School

I visualize a school that nurtures creativity, independent thoughts, mutual respect, and inclusivity with equal emphasis on providing quality education. At Ridge Valley we ensure that we discover the potential, abilities, and competencies of each child to make them global citizens of 21st Century.
